

Letter to Presidents and National Representatives of IFCC National Societies

23 March, 2017

Dear Colleagues,

We would be grateful for your assistance in reaching the Membership of your national societies to solicit information, opinions and feedback regarding the practice of Evidence Based Laboratory Medicine.

In particular, we want to find out more about knowledge and competencies in this area and how it is applied in everyday practice. We also want to gather feedback on training requirements and the preferred approaches for addressing this.

Our IFCC EBLM Committee, and in particular, Drs Nuria Gimenez and Karina Capote have collated the attached questionnaire which we are seeking to distribute.

Our goal is to have completed surveys submitted **by 30 April, 2017**.

We kindly invite you to participate in this survey that is available at

<https://www.surveymonkey.com/r/C-EBLM>

We thank you for your assistance in reaching your broadest membership.

Yours sincerely

Dr Chris M. Florkowski
Chair, C-EBLM of IFCC
